

## **A Digital Guide to the Early One-Room Schools of Garfield County, Oklahoma**

This document was prepared by Myron L. Toews for historical and archival purposes. My hope is that it will be made available to any and all who are interested. I grew up just west of Kremlin, Oklahoma, and I have always had a fascination with the one-room schools that were in my area. My mother and her siblings attended one-room schools, and several of my aunts and uncles later taught at those schools. This is an attempt to collect and organize as much of that information as possible.

This project began with a question to me from a friend who thought I was likely to know about Kremlin area one-room schools. Working on writing up the information for my local area schools led me to some useful information on ALL of the schools in the county, so my project quickly expanded into doing the entire county.

Any who have questions, corrections, or other comments are welcome to contact me at Myron Toews, 15916 Farnam Street, Omaha, NE 68118-4045, [myron.toews@gmail.com](mailto:myron.toews@gmail.com), current mobile phone 402-290-0832.

### **Sources of information for this work.**

I could not have completed this project without help from many others. My set of 1906 plat maps from Geo. E. Ogle & Co. showed school locations but did not give names or district numbers. The Garfield County Register of Deeds office was able to provide me with a list of district numbers and names and post offices, but no specific locations for any of the schools. A collection of pages for each school from the Cherokee Strip Regional Heritage Center (CSRHC), the original preparer of those pages unknown, included school district names and numbers along with specific legal descriptions for the locations. Finally, the 1901 plat maps, for which I purchased copies from CSRHC, showed not only school locations but also the school district numbers. Compiling and comparing all these sources allowed me to generate this newer set of maps and documentation. **These original sources are in a separate document to preserve them because of their historical value and interest and for any who want easy online access to them.**

I thank Traci Harris in the Garfield County Register of Deeds office for providing the first useful list, Aaron Preston from CSRHC for helping me with copies of documents there, including the 1901 plat maps used here, Shawn Tuohy from Humphrey and Guarantee Abstract for getting me access to the 1906 plat map book pages, and Vickie Tuohy for getting me good high-resolution photos of those pages. Finally, some information here comes from my own copies of the two-volume Garfield County 1893-1982 histories. **I welcome any and all additional information from anyone else who may find and make use of my own set of maps and related information.**

### **About these maps of schools by township location.**

These 1901 plat map pages are the most reliable source for school locations (in 1901, of course), because they not only show the detailed location of each school but also include the school district numbers, which are not on any other maps I have found. These detailed maps show who owned the land where the school was located also. Unfortunately, they do not include the names of the schools, so I have had to rely on other lists that link school names to either district numbers or to specific locations. This is the reason I have chosen to do my school "mapping" by township on these 1901 maps. Larger scale maps of schools for the entire county and by quadrant are on 1906 maps.

*Scans of the 1901 plat maps were purchased from the Cherokee Strip Regional History Museum; they are to be used for educational purposes only; commercial use is restricted due to potential copyright issues.*

Schools are marked with red boxes; towns with green boxes; some highways marked in blue. Note that many of the current towns did not yet exist in 1901, and that there were many other towns that died out, and that some of the areas were only "Post Offices" but not listed as "towns". This may make it difficult to navigate the maps, so I have added some of the current towns to make it easier.

Several of these schools have somewhat different locations indicated on 1906 plat maps, which show school locations but not district numbers or names. Similarly, some of the locations on 1901 maps are different than those on lists of schools prepared previously by others. I have tried to note those discrepancies and alternate locations on each of the maps that follow.

### **Legal descriptions of school locations.**

Each township is identified by a township number (T), indicating location from south to north, and by a range number (R), indicating location from west to east, as in the table above. Technically, these township numbers for Garfield County should all have an "N" after them, indicating that these are numbered going North from "the baseline", which is at latitude 34° 30'. Similarly, the range numbers should all have a "W" after them, indicating that these are numbered going West from the starting point, the Indian Meridian, which is at longitude 97° 14' 30" west from Greenwich.

Each township is laid out in a 6 x 6 grid, with each square in the grid being a "section", or one square mile, with 36 square miles per township. Each square mile or section contains 640 acres. Each section is again subdivided, in most cases, into 4 "quarters", each quarter containing 160 acres, generally referred to as "one farm". Sections are numbered 1-36, and the quarters within each section are identified as the northeast quarter (NE/4), northwest quarter (NW/4), southeast quarter (SE/4), and southwest quarter (SW/4). The quarter followed by the section number followed by the township number followed by the range number constitutes the "legal description" for a given quarter -- e.g., the NE/4 of 20-24-6 is my home place in Kremlin Township. School locations are indicated by this legal description of their location, as well as on the maps themselves.

Within each township, the section numbers start with "1" at the upper right (northeast corner), going to "6" on the upper left (northwest corner); then down one mile, with "7" on the left (west) and running to "12" at the right (east) end; and continuing this back-and-forth pattern through section 36 at the far lower left (southwest corner of the township). This is the "boustrophedon" numbering system, named after the plowing pattern of ancient Greek farmers behind their oxen.

Garfield County is almost exactly 30 townships, the exception being a tiny bit of the bottom row of sections in the bottom row of townships, which overlaps into Logan County at the bottom (south). Note from the table above that I have NOT used the "boustrophedon" system for numbering the map pages in this document.

### **School district numbering.**

Interestingly, the numbering of school districts follows a similar pattern to the numbering of sections within a township. School district #1 is in the far upper right (northeast) corner of the county, with districts numbered going west, through #12.5 in the far upper left (northwest) corner of the county. District #13 is below #12.5, with numbering then going right (east) back to the east edge of the county. Then this back-and-forth "boustrophedon" pattern continues down to the last district number in the far lower left (southwest) corner of the county. As a result, the district numbers within a township are not sequential -- for instance, districts 8, 9, 17, and 18 are the ones in Kremlin Township. Most but not all townships have 4 school districts each, approximately 3 miles apart both north and south and east and west, but not perfectly so.

### **School lands.**

In addition to the location of each school, I believe that each township also had one quarter that was designated as "school land". This was not the property where a school was located, but a "farm" that was rented out to someone, with the farm rental proceeds providing funding to support the schools of that township. I have not yet worked on locating each of these school land tracts, but I hope to add that to these files in the future.

### **Finding schools of interest.**

I have generated multiple systematic index listings of the one-room schools to aid in finding any school in any area of interest. One index lists the schools arranged by district number, a second by school name, a third alphabetically by township name, and a fourth by township map page number. These 4 index listings are on the following pages.

# 1901 vs. 1906 Plat maps

All of the one-room schools locations on the pages that follow are on 1901 plat maps from an "advertising" or "commercial" source, not from one of the more "official" plat maps assembled in 1906, 1936, and 1951. The nicer official ??? plat map from 1906 for McKinley Township, the first in the set that follows, is show below. Note the nicer color pages. Note that schools are indicated similarly on both the 1901 and 1906 maps, but that school district numbers are present on the 1901 map but not the 1906 map.

# McKinley Township
